

Subject Index to Volume 18

A

- Acetylcarnitines, interaction, insulin-stimulated glucose metabolism, E946
- Acetyl CoA carboxylase, prolactin effects, mammary gland explants, E567
- N-Acetylneuraminic acid, insulin action and, diabetes mellitus, E173
- Acidosis, glucose tolerance induced by, adrenergic blockade effects, E812
- ACTH: *see* Adrenocorticotropin
- Adenosine monophosphate, cyclic
- abnormal regulation, pancreatic islets, obesity, E833
 - adrenergic stimulation and, ANP release, E260
 - calcitonin effects on oxytocin, bladder (toad), E613
 - 1,25-dihydroxyvitamin D synthesis, hypoparathyroidism, E730
 - DNA synthesis and pH depression, osteoblasts, E9
 - hormone effects on lipid composition, testes, E442
 - neuropeptide Y mobilizes calcium, erythroleukemia cells, E880
 - PTH effects, osteoblast-like cell line, E660
- Adenylate cyclase
- glucocorticoid modulation of, brown fat, E153
 - neuropeptide Y mobilizes calcium, erythroleukemia cells, E880
 - regulation, obesity, pancreatic islets, E833
- Adipocytes
- lactate production, from glucose, regional differences, E716
 - microdialysis, lipolysis studies, E737
 - 3-O-methylglucose transport, growth hormone stimulation of, E723
 - size and number, thyroid status effects, E280
- Adipose tissue
- brown: *see* Brown fat
 - glucose intercellular levels, microdialysis, E218
 - microdialysis, lipolysis studies, E737
 - white, development, thyroid status and, E280
- Adrenal cortex
- circadian variation in response, CRF-41 and AVP, E265
 - response to bacterial endotoxin, during growth, E525
- Adrenalectomy
- diet and, denervation atrophy, muscle, E850
 - glucose and, brown fat metabolism, E597
 - modulation of cyclase activity, glucocorticoids, E153
- Adrenal gland
- corticosterone, obesity effects, E229
 - multiple renin forms, E531
 - perfusion, capsaicin, catecholamine secretion and, E23
 - structure changes, aging, E903
- Adrenal glomerulosa cells, calcium response of, external potassium, E488
- Adrenal nerve, excitation, capsaicin, E23
- Adrenergic mechanisms, insulin action opposed by, E33
- Adrenergic stimulation
- inhibition of protein synthesis during, heart, E537
 - stimulation of ANP release, E260
- Adrenocortical cells
- changes during aging, E903
 - responsiveness to ACTH, obesity and, E229
- Adrenocorticotropin
- adrenocortical cell responsiveness to, obesity and, E229
 - catecholaminergic system control, E463
 - circadian variation in response, CRF-41 and AVP, E265
 - corticosterone release, CRF infusion effects, E213
 - steroid inhibition of, E241
 - vasopressin release and, CRF and angiotensin II effects, awake state, E46
- Aging, adrenal gland changes, E903
- Alanine, production, physiological hypercortisolemia effects, E366
- Aldosterone
- cytosolic calcium and, glomerulosa cells, E338
 - plasma renin activity and, awake state, E793
 - renin, angiotensinogen, and ANP mRNA levels, E129
- Algorithms, pulse-detection, computer simulation of hormone secretion, E775
- Amiloride, DNA synthesis and pH depression, osteoblasts, E9
- Amino acids
- branched-chain, metabolism, kidney mitochondria, E475
 - kinetics, time course of cortisol action, E366
 - metabolism, insulin responsiveness of, bedrest, E548
 - muscle, protein synthesis and, E166
 - transport, tumor necrosis factor and, E206
- Amino terminus, biologically active, PTH peripheral metabolism, E886
- Anaerobic metabolism, interleukin 1, tumor necrosis factor and, E760
- Androgen, body size and (monkey), E857
- ANF: *see* Atrial natriuretic factor
- Angiotensin II
- angiotensinogen synthesis and, hepatocytes, E70
 - CRF effects and, ACTH and vasopressin release, awake state, E46
 - cytosolic calcium elevation and, glomerulosa cells, E338
 - receptors: *see* Receptors
- Angiotensinogen
- granules, renal, Triton WR-1339 in, E353
 - mRNA levels, sodium balance effects
- Angiotensinogen mRNA, regulation of accumulation, hepatocytes, E70
- ANP: *see* Atrial natriuretic peptide; Atrial natriuretic polypeptide
- Arachidonic acid, LH response to, gonadal steroid effects on, E314
- Arcuate nucleus, hypothalamic lesions, LH pulses and, E583
- Arterialization, oxygen consumption, forearm, measurement, E572
- Atherosclerosis, high-density lipoproteins, regulation of plasma lipid transfer, E894
- Atrial natriuretic factor
- glucose-stimulated insulin secretion and, E579
 - perinatal expression, cardiac tissue, E388
 - secretion, ouabain effects, atrial cardiocytes, E383
- Atrial natriuretic peptide
- adrenergic stimulation of release, E260
 - metabolic clearance of, kidney and, E934
 - release, renal function and, vasopressin effects, E449
- Atrial natriuretic polypeptide
- mRNA levels, sodium balance effects
 - release, hypercalcemia and ouabain effects, E437
- Autonomic nervous system, time-dependent involvement, hyperglycemia, 2-deoxy-D-glucose and, E928
- Awake state
- ACTH and vasopressin release, CRF and angiotensin II effects, E46
 - metabolic clearance of ANP, kidney, E934

B

- BAY K 8644, hormone release and, pituitary tumor cells, E137
- Bile, flow, triacylglycerol secretion and, liver, E306
- Bladder, hydrosmotric effect of oxytocin, calcitonin inhibition (toad), E613
- Blockade
- adrenergic
 - acidosis-induced glucose intolerance and, E812
 - glucose metabolism, endotoxin-induced increases in, E629
 - cholinergic, capsaicin excitation of adrenal nerve and, E23
- Blood flow
- forearm, glucose metabolism and sodium-potassium exchange, insulin effects, E953
 - portal, impaired thyroid hormone transport, obesity and, E54
- Blood pressure
- awake state, CRF and angiotensin II effects, E46
 - hypertension, opioids and, E839
- Body
- composition
 - adrenalectomy effects on brown fat metabolism, E597
 - androgenic influences (monkey), E857
 - weight: *see* Weight
- Bone
- density, sex steroid effects, during growth, E416
 - formation, skeletal unloading, glucocorticoids and, E875
 - mineral content, verapamil effects, E702

Brain, deep hypoglycemia, glucoreceptors in carotid perfused tissue, E680
 BRL 26830A, insulin receptors and, obesity, E101
 Brown fat
 β -adrenoceptor subtypes and adenylate cyclase, glucocorticoid modulation of, E153
 composition, fasting-refeeding repeated cycle effects, E120
 endotoxin-induced fever and, E617
 GDP binding sites, E865
 insulin receptors, thermogenic agent effects, obesity, E101
 metabolism, adrenalectomy effects, glucose and, E597
 nuclear T_3 receptor saturation, cold exposure and, E496
 thermogenesis
 CRF effects, E255
 lateral hypothalamic lesions, E708

C

Cachectin, tumor necrosis factor, metabolic effects, E206
 Calcitonin, oxytocin hydrosimotic effect and, bladder (toad), E613
 Calcium
 absorption, duodenal, verapamil effects, E702
 cytosolic, angiotensin II effects, glomerulosa cells, E338
 flux, furosemide effects on insulin release, β -cells, E591
 luteinizing hormone release and, pituitary (calf), E469
 metabolism, biologically active amino terminus, E886
 mobilization, neuropeptide Y and, erythroleukemia cells, E880
 single adrenal glomerulosa cell response, external potassium, E488
 synthesis and secretion, parathyroid hormone and secretory protein I, E299
 Calcium channels, hormone release and, pituitary tumor cells, E137
 Calcium chloride, ANP release and, E437
 Calcium ions
 cytoplasmic, diazoxide effects on insulin release, E422
 oxytocin and, bladder (toad), E613
 Calcium ion currents, hormone release and, pituitary tumor cells, E137
 Calmodulin, increased SR N-methylation, skeletal muscle, E347
 Calmodulin antagonist, LH release, GnRH and secretagogue-induced (calf), E59
 Calorimetry
 indirect
 regulation of energy stores, E332
 thyroid hormones and, E146
 cAMP: *see* Adenosine monophosphate, cyclic
 Capsaicin, catecholamine secretion excitation, adrenal sympathetic efferent nerve, E23
 Captopril, renin, angiotensinogen, and ANP mRNA levels, E129
 Carbohydrates
 dietary, sympathetic nervous system responses, skeletal muscle, E180
 feeding, very-low-density lipoprotein triglyceride kinetics and, E236
 short-term energy balance relations, E332

Cardiocytes, atrial, proatrial natriuretic factor secretion, ouabain effects, E383
 Carnitine, interaction, insulin-stimulated glucose metabolism, E946
 Carotid tissue, glucoreceptors, deep hypoglycemia and, E680
 Catecholaminergic system, stimulation of CRH secretion, E463
 Catecholamines
 exercise-induced increment, metabolic role of, E428
 heart rate control, diabetes, E636
 microdialysis, adipose tissue and blood in lipolysis studies, E737
 oxygen consumption and, forearm, E572
 secretion, excitation by capsaicin, E23
 stimulation of CRH secretion, E463
 CCK: *see* Cholecystokinin
 Central nervous system
 adrenal nerve excitation, capsaicin and, E23
 contributions, hyperglycemia, E920
 deep hypoglycemia, glucoreceptors in carotid perfused tissue, E680
 Centrifugation, equilibrium density gradient, renal renin granules, E353
 Chloride, flux, furosemide effects on insulin release, β -cells, E591
 Cholecystokinin, G protein in, pancreatic acinar cells, E652
 Cholesterol, composition, hormone effects, testes, E442
 Cholesteryl ester, transfer protein, high-density lipoprotein regulation of lipids, E894
 Circadian rhythm: *see* Rhythm
 Clearance, renal, ANP, E934
 Coenzyme A, DHEA treatment and, obesity, E1
 Cold
 exposure
 brown fat nuclear T_3 receptors, E496
 lateral hypothalamic lesions, E708
 sympathetic nervous system responses, skeletal muscle, E180
 Computer analysis
 steady-state, pancreatic islet discrimination, hexose anomers, E189, E201
 simulation, hormone secretion, pulse-detection algorithms, E775
 Corticosterone
 ACTH release, CRF infusion effects, E213
 circadian variation in response, CRF-41 and AVP, E265
 inhibition, ACTH, E241
 obesity effects, adrenocortical cells, E229
 secretion, adrenal gland changes during aging, E903
 Corticotropin-releasing factor
 angiotensin II effects and, ACTH and vasopressin release, awake state, E46
 chronic intracerebroventricular, ACTH-corticosterone release and, E213
 circadian variation in response to, E265
 glucocorticoid feedback, corticotrope, E241
 intake, brown fat thermogenesis and, E255
 secretion, regulation by glucose, E287
 Corticotropin-releasing hormone, secretion, central catecholaminergic system and, E463

Cortisol
 action, amino acid kinetics and, E366
 β -adrenergic mechanisms and, insulin action, E33
 exercise-induced increment, metabolic role of, E428
 inhibition, ACTH, E241
 CRF: *see* Corticotropin-releasing factor
 CRH: *see* Corticotropin-releasing hormone
 Cytosol, renal, growth hormone and prolactin receptors in, E293

D

Deconvolution technique, numerical, hydrocortisone secretion (horse), E688
 Dehydration
 adrenergic control of renin in, awake state, E793
 rehydration and, maternal (sheep), E674
 Dehydroepiandrosterone, short-term administration, liver metabolism, obesity, E1
 Deoxyglucose, metabolism, insulin effects, E806
 2-Deoxy-D-glucose
 hyperglycemia due to, autonomic nervous system in, E928
 regulation of CRF secretion, E287
 Development: *see also* Growth; Maturation
 bacterial endotoxin, pituitary-adrenal response to, E525
 Dexamethasone
 glutamine synthetase expression and, skeletal muscle, E397
 secretion, adrenal gland changes during aging, E903
 DHEA: *see* Dehydroepiandrosterone
 Diabetes
 heart rate control in, E636
 increased SR phospholipid N-methylation, skeletal muscle, E347
 Diabetes mellitus
 insulin release, furosemide effects, β -cells, E591
 insulin resistance of, sialic acid role in, E173
 insulin-like growth factor I receptors, renal glomeruli and tubules, E504
 Diacylglycerol, PTH effects, osteoblast-like cell line, E660
 Diaphragm, sodium-potassium-ATPase isoforms, thyroid hormone, E912
 Diazoxide, glucose inhibition of insulin release and, E422
 Diet: *see* Feeding
 Dihydrotestosterone, body size and composition and, adult (monkey), E857
 Dimethyl sulfoxide, metallothionein response, stress, liver, E518
 DNA, synthesis, parathyroid hormone and, osteoblasts, E9
 Duodenum, calcium absorption, verapamil effects, E702

E

Endocrine glands, episodic signaling, general biophysical model, E749
 Endotoxin
 bacterial, pituitary-adrenal response to, during growth, E525
 fever induced by, sympathetic nervous system and brown fat effects, E617
 increases in glucose metabolism, adrenergic blockade effects, E629

- protein synthesis, muscle glutamine and, E166
- Energy**
balance
fasting-refeeding cycle effects, E120
short-term, regulation, E332
metabolism
interleukin 1 and tumor necrosis factor role, E760
thyroid hormones and, E146
retention, adrenalectomy effects on brown fat metabolism, E597
- Epidermal growth factor**, ontogenesis of, liver, E28
- Epinephrine**
adrenal medullary secretion, excitation by capsaicin, E23
 β -adrenergic mechanisms and, insulin action, E33
adrenergic stimulation and, ANP release, E260
cAMP and, obesity, pancreatic islets, E833
exercise-induced increment, metabolic role of, E428
glucose intolerance and, thyrotoxicosis, E843
glucose metabolism and, endotoxemia, E629
hyperglycemia, CNS-mediated, E920
infusion, intravenous glucose tolerance and, E668
plasma renin activity and, awake state, E793
- Erythroleukemia cells**, adenylate cyclase in, neuropeptide Y mobilizes calcium, E880
- Estradiol**, angiotensinogen synthesis and, hepatocytes, E70
- 17 β -Estradiol**, LH response and, arachidonic acid and protein kinase C, E314
- Estrogen**, bone density and, during growth, E416
- Euglycemic clamp**, glucose kinetics during, isotope infusion effects, E871
- Euhydration**, adrenergic control of renin in, awake state, E793
- Exercise**
epinephrine increment induced by, metabolic role of, E428
regulation, triiodothyronine metabolism, E824
running, muscular glucose clearance, E456
- Extensor digitorum longus muscle**, sodium-potassium transport, thyroid hormone effects, E604
- F**
- Fasting**
adrenalectomy and, denervated muscle, E850
diet effects, sympathetic nervous system responses, skeletal muscle, E180
glutamine concentration, protein synthesis relations, muscle, E166
GnRH sensitivity, prepubertal females, E482
lactate production, regional, adipocytes, E716
refeeding and, repeated cycle effects on brown fat composition, E120
- Fat**
balances, short-term energy balance relations, E332
epididymal, development, thyroid status and, E280
- Fat cells**: see Adipocytes
- Fatty acids**
composition, hormone effects, testes, E442
free, epinephrine in exercise, E428
- Feeding**
body size and composition, androgenic influences (monkey), E857
brown fat thermogenesis and, CRF effects, E255
diet
adrenalectomy and, denervated muscle, E850
sympathetic nervous system responses, skeletal muscle, E180
fasting-refeeding repeated cycles, brown fat composition and, E120
underfeeding, GnRH sensitivity, prepubertal females, E482
- Fetus**: see also Pregnancy
glucose kinetics, somatostatin and glucose infusion effects (sheep), E87
glycogen precursors (sheep), E743
plasma and urinary responses, maternal dehydration and rehydration (sheep), E674
- Fever**, endotoxin-induced, sympathetic nervous system and brown fat effects, E617
- Filtration**
glomerular
angiotensin II receptors, E16
metabolic clearance of ANP, E934
- Follicle-stimulating hormone**, GnRH sensitivity, underfeeding and, prepubertal females, E482
- Forskolin**, DNA synthesis and pH depression, osteoblasts, E9
- Fructose**, kinetics, carbohydrate feeding and, E236
- Fura-2**, cytosolic calcium and, glomerulosa cells, E338
- Furosemide**, insulin release and, β -cells, E591
- G**
- GDP**: see Guanosine diphosphate
- Gene**, expression, ANF, cardiac tissue, perinatal, E388
- GHRF**: see Growth hormone-releasing hormone
- Glomerulosa cells**, angiotensin II, cytosolic calcium elevation and, E338
- Glucagon**
 β -adrenergic mechanisms and, insulin action, E33
glucose intolerance and, thyrotoxicosis, E843
hyperglycemia, CNS-mediated, E920
insulin secretion stimulated by, ANF effects, E579
secretion, nonadrenergic sympathetic neural influences, E785
- Glucocorticoids**
angiotensinogen synthesis and, hepatocytes, E70
bone formation inhibition, skeletal unloading and, E875
feedback, corticotrope, E241
- glutamine synthetase expression and, skeletal muscle, E397
- Glucokinase**, pancreatic islet discrimination of, computer simulation, E189, E201
- Gluconeogenesis**, precursors to glycogen, fetus (sheep), E743
- Glucoregulation**
exercise, epinephrine role in, E428
hyperglycemia, CNS-mediated, E920
- Glucose**
adrenalectomy, brown fat metabolism and, E597
inhibition of insulin, diazoxide effects, E422
insulin secretion stimulated by, ANF effects, E579
intercellular level, subcutaneous tissue, microdialysis of, E218
intolerance
acidosis-induced, adrenergic blockade effects, E812
thyrotoxicosis, E843
kinetics
carbohydrate feeding and, E236
isotope infusion effects, euglycemic clamp, E871
somatostatin and glucose infusion effects, fetus (sheep), E87
lactate production from, adipocytes, regional differences, E716
metabolism
endotoxin-induced, adrenergic blockade effects, E629
insulin effects, E806
insulin-stimulated, carnitine interaction with, E946
muscle, physical inactivity and, E456
oxidative and nonoxidative, thyroid hormone effects, E146
sensitivity to insulin, circadian rhythm and, muscle, E41
stimulation by insulin, E953
triacylglycerol secretion and, liver, E306
muscle, euglycemic hyperinsulinemia, E942
pancreatic islet discrimination of, computer simulation, E189
precursors, fetus (sheep), E743
production, β -adrenergic mechanisms, E33
regulation of CRF secretion, E287
tolerance, epinephrine infusion effects, E668
transport
hormone-stimulated, phenylarsine oxide and denervation effects, E159
muscle insulin resistance and, obesity, E374
uptake
non-insulin- and insulin-mediated, tissue sites, E769
prolonged insulin stimulation and, muscle, E621
- Glutamine**
concentration, protein synthesis relations, skeletal muscle, E166
physiological hypercortisolemia effects, E366
- Glutamine synthetase**, expression, dexamethasone effects, skeletal muscle, E397
- Glutathione**, metabolism, α -adrenergic modulation of, hepatocytes, E801

- Glycerol, microdialysis, adipose tissue and blood, E737
- Glycogen
precursors, fetus (sheep), E743
storage, during insulin stimulation, muscle, E621
synthesis, sensitivity to insulin, circadian rhythm and, muscle, E41
- Glycogen synthase, insulin resistance, muscle, obesity and, E374
- Glycosylation, hepatic clearance, renal renin, E642
- GnRH: *see* Gonadotropin-releasing hormone
- Gonadotropin, human chorionic, testes lipid composition and, E442
- Gonadotropin-releasing hormone
calcium and sodium effects on LH release, pituitary (calf), E469
hypothalamic, alterations over normal menstrual cycle, E696
LH release induced by, calmodulin antagonist effects (calf), E59
sensitivity, starvation and, prepubertal females, E482
- G protein, PI hydrolysis and, pancreatic acinar cells, E652
- Growth: *see also* Development; Maturation androgenic influences, adult (monkey), E857
compensatory, lung, perioperative hypoxemia and, E65
regulation, kidney, insulin-like growth factor I receptors, E504
sex steroid effects, bone density, E416
- Growth hormone
binding proteins for, kidney cytosol, E293
muscle hypertrophy stimulated by, IGF-I and -II gene expression, E513
status, white adipose tissue development and, E280
stimulation, 3-O-methylglucose transport, E723
- Growth hormone cell, calcium channels, hormone release and, E137
- Growth hormone-releasing hormone, biphasic stimulation, SRIF secretion, hypothalamic cells, E829
- Guanosine diphosphate, binding, brown fat, E865

H

- Heart
adrenalectomy effects, brown fat metabolism, glucose feeding and, E597
endothelial lipoprotein lipase, metabolic fate of, E247
protein synthesis, acute inhibition, β -adrenergic stimulation or hypoxia, E537
tissue, ANF gene expression, perinatal, E388
- Heart rate
awake state, CRF and angiotensin II effects, E46
control, diabetes, E636
- Heat, production, lateral hypothalamic lesions, E708
- Heating, contralateral hand, forearm oxygen consumption and, E572
- Heparin, metabolic fate of lipoprotein lipase and, heart, E247
- Hepatocytes
angiotensinogen mRNA accumulation, regulation of, E70

- glutathione metabolism, α -adrenergic modulation of, E801
sialic acid effects, diabetes mellitus, E173
- Hexokinase, muscle, obesity and, E374
- Hexose, transport, stimulation, growth hormone, E723
- Homocysteine, methionine cycle, quantitative study, E322
- Hormonal responses, recombinant human tumor necrosis factor, E206
- Hormones: *see also* specific hormone
pulsatile secretion, computer simulation, E775
release, episodic endocrine gland, model, E749
- Hydrocortisone
impaired thyroid hormone transport, obesity and, E54
secretion, numerical deconvolution (horse), E688
- Hydrolase, DHEA treatment and, obesity, E1
- 6-Hydroxydopamine, stimulation of CRH secretion, E463
- Hypercalcemia, ouabain and, ANP release, E437
- Hypercortisolemia, physiological, amino acid kinetics, E366
- Hyperglycemia
CNS-mediated, nervous system and hormone contributions, E920
2-deoxy-D-glucose, autonomic nervous system in, E928
- Hyperinsulinemia, euglycemic, muscle glucose during, E942
- Hypertension, naloxone attenuation of, E839
- Hypoglycemia, deep, glucoreceptors and, carotid perfused tissue, E680
- Hypoparathyroidism, 1,25-dihydroxyvitamin D synthesis in, E730
- Hypothalamic cells, SRIF secretion, biphasic stimulation by GHRF, E829
- Hypothalamus
circadian variation in response, CRF-41 and AVP, E265
CRF secretion, regulation by glucose, E287
deep hypoglycemia, glucoreceptors in carotid perfused tissue, E680
hyperglycemia, CNS-mediated, E920
lesions
electrolytic and chemical, LH pulses and, E583
lateral, thermogenesis after, E708
- Hypothyroidism, sodium-potassium transport, thyroid hormone effects, E604
- Hypoxemia, perioperative, postpneumectomy lung growth and, E65
- Hypoxia, inhibition of protein synthesis during, heart, E537

I

- Indicator dilution technique, insulin uptake, renal cortical epithelium, E357
- Inositol polyphosphates, PTH effects, osteoblast-like cell line, E660
- Inositol triphosphate, adrenergic stimulation and, ANP release, E260
- Insulin
action, β -adrenergic mechanisms and, E33
deoxyglucose pharmacokinetics and, E806

- dependent and independent fetus, glucose kinetics, somatostatin and glucose infusion effects (sheep), E87
- epinephrine, exercise-induced increment, E428
- glucose inhibition of, diazoxide effects, E422
- glucose metabolism stimulated with, carnitine interaction and, E946
- glucose-activated secretion, ANF effects, E579
- glucose uptake mediated by, tissue sites, E769
- hyperglycemia, autonomic nervous system in, E928
inhibition of protein synthesis, heart, E537
metabolism, endotoxin-induced, adrenergic blockade effects, E629
plasma, euglycemic hyperinsulinemia, E942
prolonged stimulation, glycogen storage during, muscle, E621
regional differences, adipocytes, E716
release, furosemide effects, β -cells, E591
resistance
acidosis effects, E812
diabetes mellitus, sialic acid role in, E173
muscle, obesity and, E374
responsiveness, protein metabolism, breast, E548
- secretion
cAMP and, pancreatic islets, obesity, E833
nonadrenergic sympathetic neural influences, E785
- sensitivity
epinephrine infusion and, E668
muscle, circadian rhythm and, E41
muscular glucose metabolism, resting and running, E456
- sodium-potassium exchange, glucose metabolism and, E953
stimulation of glucose transport, phenylarsine oxide and denervation effects, E159
thyroid status, white adipose tissue development and, E280
triacylglycerol secretion and, liver, E306
uptake, renal cortical epithelium, E357
- Insulin-like growth factor, stimulation of glucose transport, phenylarsine oxide and denervation effects, E159
- Insulin-like growth factor I
distinct receptors for, renal glomeruli and tubules, E504
gene expression, muscle, E513
- Interleukin 1, tumor necrosis factor and, energy metabolism, E760
- Islets of Langerhans
diazoxide effects, glucose inhibition of insulin, E422
glucose-stimulated insulin secretion, ANF effects, E579
- Isoform, sodium-potassium-ATPase, high-ouabain-affinity by thyroid hormone, E912
- Isoproterenol
adrenergic stimulation and, ANP release, E260
heart rate control, diabetes, E636
inhibition of protein synthesis, heart, E537
- Isotopes, infusion, glucose kinetics and, euglycemic clamp, E871

K

- Kaliuresis, vasopressin effects, E449
 Keto acids, metabolism, regulation in kidney mitochondria, E475
 Ketogenesis, flow rate and insulin effects, liver, E306
 α -Ketoisocaproate, metabolism, regulation in kidney mitochondria, E475
 Kidney
 function, ANP release and, vasopressin effects, E449
 hepatic clearance of renin, glycosylation for, E642
 metabolic clearance, ANP, E934
 mitochondria, valine and α -ketoisocaproate metabolism, E475
 preglomerular vessels, angiotensin II receptors, E16
 renin granules, Triton WR-1339 in, E353
 Kidney cortex, epithelium, insulin uptake, E357
 Kidney glomeruli, insulin-like growth factor I, distinct receptors for, E504
 Kidney tubules, insulin-like growth factor I, distinct receptors for, E504
 Kinins, thyroidectomy and, E411

L

- Lactate
 epinephrine, exercise-induced increment, E428
 precursors, fetus (sheep), E743
 production, from glucose, adipocytes, E716
 Leucine
 kinetics, time course of cortisol action, E366
 metabolism, insulin responsiveness of, bedrest, E548
 LH: see Luteinizing hormone
 Lipids
 biosynthesis, prolactin effects, mammary gland explants, E567
 composition, hormone effects, testes, E442
 metabolism, thyroid hormones and, E146
 plasma, regulation of transfer by high-density lipoproteins, E894
 Lipogenesis
 flow rate and insulin effects, liver, E306
 insulin-sensitive, diabetes mellitus, E173
 Lipolysis studies, adipose tissue, microdialysis in, E737
 Lipoprotein
 high-density, plasma lipid transfer and, E894
 secretion, hepatic, perfusion rate and, E306
 very-low-density, triglyceride kinetics, carbohydrate feeding and, E236
 Lipoprotein lipase, endothelial, heart metabolic fate, E247
 Liver
 clearance of renal renin, glycosylation for, E642
 epidermal growth factor, ontogenesis of, E28
 glucose intolerance, thyrotoxicosis, E843
 glycogen, sensitivity to insulin, circadian rhythm and, muscle, E41
 lipid peroxidation, metallothionein response to stress, E518
 metabolism, DHEA effects, obesity, E1
 perfused, thyroxine uptake, E110

- thyroid hormone kinetics, D-propranolol treatment and, E80
 triacylglycerol secretion, flow rate and insulin effects on, E306
 uptake index, obesity and, E54
 Lung
 modulation of cyclase activity, glucocorticoids, E153
 postpneumonectomy growth, perioperative hypoxemia effects, E65
 Luteinizing hormone
 GnRH and secretagogue-induced release, calmodulin antagonist effects (calf), E59
 GnRH sensitivity, underfeeding and, prepubertal females, E482
 pulsatile secretion, computer simulation, E775
 pulses, electrolytic and chemical hypothalamic lesion effects, E583
 release, hypothalamic GnRH sequence, menstrual cycle, E696
 response to arachidonic acid and protein kinase C, gonadal steroid effects on, E314
 Luteinizing hormone-releasing factor, gonadal suppression, growth during, E559

M

- Malic enzyme, DHEA treatment and, obesity, E1
 Mammary gland, lipid biosynthesis, prolactin effects, E567
 Mannose, pancreatic islet discrimination of, computer simulation, E189
 Maturation: see also Development; Growth
 GnRH sensitivity, underfeeding and, prepubertal females, E482
 skeletal, sex steroids impact on, E559
 Membrane, luminal, renal cortical epithelium, E357
 Menstrual cycle, alterations, hypothalamic GnRH sequence, E696
 Metabolic responses, recombinant human tumor necrosis factor, E206
 Methionine, metabolism, quantitative study, E322
 Methoxamine, adrenergic stimulation and, ANP release, E260
 N-Methyl-DL-aspartate, LH pulses, arcuate nucleus and, E583
 3-O-Methylglucose, transport, stimulation, growth hormone, E723
 Microdialysis
 adipose tissue, lipolysis studies, E737
 glucose intercellular levels, subcutaneous tissues, E218
 Models
 compartmental, tracer methodology, E94
 general biophysical, episodic endocrine gland signaling, E749
 theoretical, insulin effects on deoxyglucose metabolism, E806
 thyroxine uptake, perfused liver, E110
 Monoclonal antibodies, anti-receptor, kidney cytosol, E293
 Muscle
 glucose metabolism, physical inactivity and, E456
 glycogen storage, prolonged insulin stimulation and, E621
 insulin resistance, obesity, E374
 insulin sensitivity, circadian rhythm and, E41

- Muscle, heart
 function, during stress, E518
 hypertrophy, growth hormone-stimulated, IGF-I and -II gene Metallothionein
 Muscle, skeletal
 denervated, adrenalectomy and diet effects, E850
 glucose
 euglycemic hyperinsulinemia, E942
 non-insulin- and insulin-mediated uptake, E769
 glutamine synthetase expression, dexamethasone effects, E397
 hormone stimulated glucose transport, phenylarsine oxide and denervation effects, E159
 hypertrophy, growth hormone-stimulated, IGF-I and -II gene expression, E513
 oxygen consumption, heating contralateral hand and, E572
 protein synthesis, glutamine concentration relations, E166
 sodium-potassium-ATPase isoforms, thyroid hormone, E912
 sodium-potassium transport, thyroid hormone effects, E604
 sympathetic nervous system responses, diet and cold exposure, E180
 thermogenic agent effects, insulin receptors, obesity, E101
 Muscle fiber
 types
 glycogen storage during insulin stimulation, E621
 insulin resistance, obesity, E374
 Myometrium, pregnancy, α_2 -adrenoceptors in (guinea pig), E272

N

- Naloxone, development of hypertension and, E839
 Natriuresis, vasopressin effects, E449
 Neostigmine, hyperglycemia, CNS-mediated, E920
 Nephrectomy, insulin-like growth factor I receptors, E504
 Neuropeptide Y, calcium mobilization, erythroleukemia cells, E880
 Nitrendipine, hormone release and, pituitary tumor cells, E137
 Nitrogen, balance, protein metabolism during bedrest, E548
 Norepinephrine
 β -adrenergic mechanisms and, insulin action, E33
 cold and diet effects, skeletal muscle, E180
 glucose metabolism and, endotoxemia, E629
 plasma renin activity and, awake state, E793
 turnover, adrenalectomy effects on brown fat metabolism, E597

O

- Obesity
 abnormal regulation of cAMP, pancreatic islets, E833
 ACTH, adrenocortical cell responsiveness to, E229
 CRF effects, food intake and brown fat thermogenesis, E255

Obesity (*continued*)

- DHEA administration effects, liver metabolism, E1
- insulin receptors, BRL 26830A effects, E101
- insulin resistance, muscle, E374
- oxygen consumption, forearm, measurement, E572
- regulation of energy stores, E332
- thyroid hormone transport impairment, E54
- Opioid, endogenous, naloxone effects on hypertension, E839
- Osteoblast
 - inositol polyphosphates and diacylglycerol, PTH elevation of, E660
 - pH and DNA synthesis, parathyroid hormone effects, E9
- Osteoporosis, disuse, glucocorticoids and, E875
- Ouabain
 - binding, sodium-potassium-ATPase isoforms and, E912
 - hypercalcemia and, ANP release, E437
 - proatrial natriuretic factor secretion and, atrial cardiocytes, E383
 - sodium-potassium pump, insulin and, E953
 - sodium-potassium transport and, skeletal muscle, E604
- Oxygen
 - consumption
 - lateral hypothalamic lesions, E708
 - measurement, forearm, E572
 - sympathetic nervous system and brown fat effects, E617
 - triacylglycerol secretion and, liver, E306
- Oxytocin, hydrosomotic effects, calcitonin and, bladder (toad), E613

P

- Pancreas, glucose intolerance, thyrotoxicosis, E843
- Pancreatic acini, cells, G protein stimulation of PI hydrolysis, CCK and, E652
- Pancreatic cells
 - β -cells
 - glucose inhibition of insulin, diazoxide effects, E422
 - glucose tolerance, epinephrine effects, E668
 - insulin release, furosemide effects, E591
- Pancreatic hormone, basal secretion, non-adrenergic sympathetic neural influences, E785
- Pancreatic islets
 - abnormal regulation of cAMP, obesity, E833
 - discrimination, hexose anomers, computer analysis, E189, E201
- Parathyroid hormone
 - inositol polyphosphate and diacylglycerol, osteoblast-like cell line, E660
 - peripheral metabolism, E886
 - pH and DNA synthesis, osteoblasts, E9
 - regulation of 1,25-dihydroxyvitamin D synthesis, E730
 - resistance, verapamil effects, E702
 - synthesis and secretion, calcium effects, E299
- Peptides, secretion, nonadrenergic sympathetic neural influences, E785

- Perinatal period, gene expression, ANF, E388
- Permeability, water, calcitonin inhibition, bladder (toad), E613
- Pertussis toxin, cAMP and, obesity, pancreatic islets, E833
- pH, depression, parathyroid hormone and, osteoblasts, E9
- Phenoxybenzamine
 - ANP release and, E437
 - plasma renin activity and, awake state, E793
- Phentolamine, adrenergic stimulation and, ANP release, E260
- Phenylalanine, kinetics, time course of cortisol action, E366
- Phenylarsine oxide, denervation and, hormone-stimulated glucose transport, E159
- Phenylephrine, glutathione metabolism and, hepatocytes, E801
- Phenylephrine hydrochloride, ANP release and, E437
- Phorbol 12-myristate 13-acetate, DNA synthesis and pH depression, osteoblasts, E9
- Phosphate, deprivation, hypoparathyroidism, E730
- Phosphofructokinase, pancreatic islet discrimination of, computer simulation, E189, E201
- Phospholipids, increased SR N-methylation, skeletal muscle, E347
- PI: see Polyphosphoinositide
- Pituitary
 - circadian variation in response, CRF-41 and AVP, E265
 - LH release, calmodulin antagonist effects (calf), E59
 - LH response, steroid effects on, E314
 - luteinizing hormone release, calcium and sodium role in (calf), E469
 - response to bacterial endotoxin, during growth, E525
- Pituitary tumor cells, hormone release, calcium channels and, E137
- Plasma, constituents: see specific constituent
- Pneumectomy, lung growth after, perioperative hypoxemia effects, E65
- Polyphosphoinositide, hydrolysis, G protein stimulation of, CCK and, pancreatic acinar cells, E652
- Potassium, external, calcium response of single adrenal glomerulosa cells, E488
- Preglomerular vessels, renal, angiotensin II receptors in, E16
- Pregnancy: see also Fetus
 - preglomerular vessels, angiotensin II receptors in, kidney, E16
 - rauwolscine binding, myometrial α_2 -adrenoceptors (guinea pig), E272
- Proatrial natriuretic factor, secretion, ouabain effects, atrial cardiocytes, E383
- Prolactin
 - binding proteins for, kidney cytosol, E293
 - lipid biosynthesis and, mammary gland explants, E567
 - lipid composition and, testes, E442
- Propranolol
 - adrenergic stimulation and, ANP release, E260
 - ANP release and, E437
 - plasma renin activity and, awake state, E793

- D-Propranolol, three-compartmental analysis effects, thyroid hormone kinetics, E80
- Protein
 - binding, growth hormone and prolactin, kidney cytosol, E293
 - metabolism, insulin responsiveness of, bedrest, E548
 - short-term energy balance relations, E332
 - synthesis
 - glutamine concentration relations, muscle, E166
 - heart, β -adrenergic stimulation or hypoxia, E537
 - uncoupling
 - fasting-refeeding cycle effects, E120
- Protein kinase C, LH response to, gonadal steroid effects on, E314
- Proteolysis, physiological hypercortisolemia effects, E366
- Pseudohypoparathyroidism, 1,25-dihydroxyvitamin D synthesis in, E730
- PTH: see Parathyroid hormone
- Puberty, skeletal growth and maturation, sex steroids and, E559
- Pump, sodium-potassium, stimulation by insulin, E953
- Purine nucleotides, binding, brown fat, E865
- Pyruvate dehydrogenase, prolactin effects, mammary gland explants, E567

R

- Radioimmunoassay, liver, ontogenesis of epidermal growth factor, E28
- Rauwolscine, binding to adrenoceptors, pregnancy and (guinea pig), E272
- Receptors
 - adrenoceptors, rauwolscine binding to, pregnancy (guinea pig), E272
 - β -adrenoceptor subtypes, glucocorticoid modulation of, brown fat, E153
 - angiotensin II, renal preglomerular vessels, E16
 - insulin
 - renal cortical epithelium, E357
 - thermogenic agent effects, obesity, E101
 - insulin-like growth factor I, renal glomeruli and tubules, E504
 - somatotrophin, kidney cytosol, E293
- Rehydration, dehydration and, maternal (sheep), E674
- Renal artery, constriction, metabolic clearance of ANP, E934
- Renin
 - adrenergic control, euhydration and water deprivation, awake state, E793
 - granules, renal, Triton WR-1339 in, E353
 - mRNA levels, sodium balance effects multiple forms, adrenal gland, E531
 - renal, hepatic clearance of, glycosylation for, E642
- Resistance, insulin, muscle, obesity and, E374
- Rhythm, circadian, insulin sensitivity and, muscle, E41
- Ribonucleic acid
 - messenger
 - hepatic epidermal growth factor, E28

renin, angiotensinogen, and ANP, sodium balance effects, E129

S

- Sarcoplasmic reticulum, increased phospholipid N-methylation, skeletal muscle, diabetes and, E347
- Secretagogue, LH release induced by, calmodulin antagonist effects (calf), E59
- Secretory protein I, synthesis and secretion, calcium effects, E299
- Sepsis
interleukin 1, tumor necrosis factor and, energy metabolism, E760
pituitary-adrenal response, during growth, E525
- Sex differences, androgenic influences, body size and composition (monkey), E857
- Sex steroids
bone density and, during growth, E416
suppression of growth, skeletal, E559
- Shock
endotoxin, glucose metabolism, adrenergic blockade effects, E629
glutathione metabolism and, hepatocytes, E801
- Sialic acid, insulin action and, diabetes mellitus, E173
- Sodium
balance, renin, angiotensinogen and ANP mRNA levels, E129
luteinizing hormone release and, pituitary (calf), E469
- Sodium potassium, transport, thyroid hormone effects, skeletal muscle, E604
- Sodium-potassium-ATPase, high-ouabain-affinity isoform, thyroid hormone, E912
- Sodium-potassium exchange, independent stimulation, insulin, E953
- Soleus muscle
insulin sensitivity, circadian rhythm and, E41
sodium-potassium transport, thyroid hormone effects, E604
- Somatomedin, gene expression, muscle, E513
- Somatostatin
GHRH causes biphasic stimulation, hypothalamic cells, E829
glucose and, glucose kinetics, fetus (sheep), E87
secretion, nonadrenergic sympathetic neural influences, E785
- Somatotropin, stimulation, 3-O-methylglucose transport, E723
- SRIF: see Somatostatin
- SR: see Sarcoplasmic reticulum
- Starvation: see Fasting
- Steroid hormones
GnRH sensitivity, underfeeding and, prepubertal females, E482
gonadal, LH response to arachidonic acid and protein kinase C, E314
inhibition, ACTH, E241
plasma protein-mediated transport, E221
transport, plasma protein-mediated, E403
- Stress
glutathione metabolism and, hepatocytes, E801
metallothionein response to, E518
- Substrates
cycle, DHEA and, obesity, E1

- tracer methodology, E94
- Sympathetic nerves, nonadrenergic mediation of, basal pancreatic hormone secretion, E785
- Sympathetic nervous system
cold and diet effects, skeletal muscle, E180
CRF effects, food intake and brown fat thermogenesis, E255
deep hypoglycemia, glucoreceptors in carotid perfused tissue, E680
endotoxin-induced fever and, E617
- Sympathetic neural effects, nonadrenergic mediation of, basal pancreatic hormone secretion, E785
- Synthase, DHEA treatment and, obesity, E1

T

- Testes, plasma membrane, hormone effects, E442
- Testosterone
body size and composition and, adult (monkey), E857
bone density and, during growth, E416
LH response and, arachidonic acid and protein kinase C, E314
- Theophylline, glucose inhibition of insulin release, E422
- Thermogenesis
brown fat
CRF effects, E255
nuclear T_3 receptors, E496
cold and diet effects, skeletal muscle, E180
GDP binding, brown fat, E865
glucose-induced, thyroid hormones and, E146
lateral hypothalamic lesions, E708
oxygen consumption and, forearm, E572
- Thermogenic agents, insulin receptors and, obesity, E101
- Thermogenin, insulin receptors and, obesity, E101
- Thermoregulation, brown fat composition, fasting-refeeding cycle effects, E120
- Thyroid, status, white adipose tissue development and, E280
- Thyroidectomy, kinins and, E411
- Thyroid hormones
activation, cold exposure, brown fat, E496
glucose metabolism and, E146
kinetics, three-compartmental analysis effects of D-propranolol, E80
kinins and, E411
plasma protein-mediated transport, E221
sodium-potassium-ATPase, high-ouabain-affinity isoform of, E912
sodium-potassium transport and, skeletal muscle, E604
status, white adipose tissue development and, E280
transport
impaired, obesity and, E54
plasma protein-mediated, E403
- Thyrotoxicosis, glucose intolerance in, role of insulin, glucagon, and epinephrine, E843
- Thyroxine
conversion to triiodothyronine, cold exposure and, brown fat, E496
kinetics, three-compartmental analysis effects of D-propranolol, E80
uptake, liver, E110

- Tracer techniques
glucose kinetics, euglycemic clamp, E871
substrates, model, E94
- Triacylglycerol, secretion, flow rate and insulin effects, liver, E306
- Triglycerides, kinetics, carbohydrate feeding and, E236
- Triiodothyronine
kinetics, three-compartmental analysis effects of D-propranolol, E80
metabolism, exercise regulation of, E824
- Triton WR-1339, renin granules, renal, E353
- Tumor necrosis factor
interleukin 1 and, energy metabolism, E760
recombinant human, hormonal and metabolic responses, E206
- Tyrosine kinase, activity, thermogenic agent effects, obesity, E101

U

- Unloading, skeletal, bone formation and, glucocorticoid effects, E875
- Uterus, sympathetic innervation, pregnancy (guinea pig), E272

V

- Valine, metabolism, regulation in kidney mitochondria, E475
- Vasopressin
ACTH release and, CRF and angiotensin II effects, awake state, E46
ANP release, renal function and, E449
arginine, circadian variation in response to, E265
dehydration and rehydration, maternal (sheep), E674
plasma renin activity and, awake state, E793
regulation of CRF secretion, E287
- Verapamil, PTH resistance and, duodenal calcium absorption, E702
- Vitamin D
1,25-dihydroxy-, hypoparathyroidism and pseudohypoparathyroidism, E730
metabolism, verapamil effects, E702
- Vitamin E, lipid peroxidation, metallothionein response to stress, E518
- Volume, plasma, adrenal gland changes during aging, E903

W

- Water
deprivation, adrenergic control of renin in, awake state, E793
extracellular content, muscle glucose, E942
- Weight
body
fasting-refeeding cycle effects, brown fat, E120
loss, CRF effects on food intake, E255
- Weightlessness, bone formation and skeletal unloading, glucocorticoid effects, E875

Z

- Zinc, tumor necrosis factor, metabolic effects, E206
- Zona fasciculata, cells, corticosterone in, obesity effects, E229
- Zona glomerulosa, cells, corticosterone in, obesity effects, E229

American Journal of Physiology: Endocrinology and Metabolism

No. 1. JULY 1988

Effect of short-term DHEA administration on liver metabolism of lean and obese rats <i>P. F. Mohan and M. P. Cleary</i>	E1
Parathyroid hormone depresses cytosolic pH and DNA synthesis in osteoblast-like cells <i>I. R. Reid, R. Civitelli, L. V. Avioli, and K. A. Hruska</i>	E9
Angiotensin II receptors in rabbit renal preglomerular vessels <i>G. P. Brown and R. C. Venuto</i>	E16
Adrenal sympathetic efferent nerve and catecholamine secretion excitation caused by capsaicin in rats <i>T. Watanabe, T. Kawada, M. Kurosawa, A. Sato, and K. Iwai</i>	E23
Ontogenesis of epidermal growth factor in liver of BALB mice <i>N. P. Laborde, M. Grodin, G. Buenaflor, P. Brown, and D. A. Fisher</i>	E28
Physiological insulin action is opposed by β -adrenergic mechanisms in dogs <i>G. A. Werther, S. Joffe, R. Artal, and M. A. Sperling</i>	E33
Circadian rhythm in sensitivity of glucose metabolism to insulin in rat soleus muscle <i>B. Leighton, J. M. Kowalchuk, R. A. J. Challiss, and E. A. Newsholme</i>	E41
Effects of CRF and ANG II on ACTH and vasopressin release in conscious dogs <i>C. K. Klingbeil, L. C. Keil, D. Chang, and I. A. Reid</i>	E46
Impaired transport of thyroid hormones into livers of obese (<i>ob/ob</i>) mice <i>F. B. Hillgartner and D. R. Romsos</i>	E54
Calmodulin antagonist effects on GnRH and secretagogue-induced release of bovine LH <i>J. P. Kile and M. S. Amoss, Jr.</i>	E59
Minimizing perioperative hypoxemia does not affect postpneumectomy lung growth <i>H. W. Karl, E. B. Wolpert, and D. E. Rannels</i>	E65
Regulation of angiotensinogen mRNA accumulation in rat hepatocytes <i>E. T. Ben-Ari and J. C. Garrison</i>	E70
Three-compartmental analysis of effects of D-propranolol on thyroid hormone kinetics <i>J. T. M. van der Heijden, E. P. Krenning, H. van Toor, G. Hennemann, and R. Docter</i>	E80
Effects of somatostatin and glucose infusion on glucose kinetics in fetal sheep <i>C. A. Bloch, R. K. Menon, and M. A. Sperling</i>	E87

MODELING METHODOLOGY FORUM

Measuring tracee turnover from tracer specific activity in the steady state <i>S. L. Lehman and W. C. Stanley</i>	E94
--	-----

No. 2. AUGUST 1988

EDITORIAL

A new journal <i>P. C. Johnson</i>	E99
---------------------------------------	-----

Effect of a thermogenic agent, BRL 26830A, on insulin receptors in obese mice <i>N. Rochet, J.-F. Tanti, T. Grémeaux, E. Van Obberghen, and Y. Le Marchand-Brustel</i>	E101
Uptake of thyroxine by the perfused rat liver: implications for the free hormone hypothesis <i>C. M. Mendel, R. R. Cavalieri, and R. A. Weisiger</i>	E110
Effects of repeated cycles of fasting-refeeding on brown adipose tissue composition in mice <i>M. Desautels and R. A. Dullos</i>	E120

Sodium balance effects on renin, angiotensinogen, and atrial natriuretic polypeptide mRNA levels <i>H. Iwao, K. Fukui, S. Kim, K. Nakayama, H. Ohkubo, S. Nakanishi, and Y. Abe</i>	E129
Two types of calcium channels and hormone release in human pituitary tumor cells <i>N. Yamashita, H. Matsunaga, N. Shibuya, A. Teramoto, K. Takakura, and E. Ogata</i>	E137
Effect of thyroid hormones on oxidative and nonoxidative glucose metabolism in humans <i>M. J. Müller, K. J. Acheson, E. Jequier, and A. G. Burger</i>	E146
Glucocorticoids modulate β -adrenoceptor subtypes and adenylate cyclase in brown fat <i>P. J. Scarpace, L. A. Baresi, and J. E. Morley</i>	E153
Phenylarsine oxide and denervation effects on hormone-stimulated glucose transport <i>M. O. Sowell, K. A. Robinson, and M. G. Buse</i>	E159
Relationship between glutamine concentration and protein synthesis in rat skeletal muscle <i>M. M. Jepson, P. C. Bates, P. Broadbent, J. M. Pell, and D. J. Millward</i>	E166
Role of sialic acid in insulin action and the insulin resistance of diabetes mellitus <i>A. I. Salhanick and J. M. Amatruda</i>	E173
Sympathetic nervous system responses to cold exposure and diet in rat skeletal muscle <i>A. G. Dulloo, J. B. Young, and L. Landsberg</i>	E180
Pancreatic islet discrimination of hexose anomers. I. Steady-state computer simulation <i>M. J. Achs and D. Garfinkel</i>	E189
Pancreatic islet discrimination of hexose anomers. II. Transient computer simulation <i>M. J. Achs and D. Garfinkel</i>	E201
Hormonal and metabolic response to recombinant human tumor necrosis factor in rat: in vitro and in vivo <i>R. S. Warren, H. F. Starnes, Jr., N. Alcock, S. Calvano, and M. F. Brennan</i>	E206
Chronic intracerebroventricular CRF infusion attenuates ACTH-corticosterone release <i>J. J. Cunningham, P. A. Meara, R. Y. Lee, and H. H. Bode</i>	E213

RAPID COMMUNICATIONS

Characterization by microdialysis of intercellular glucose level in subcutaneous tissue in humans <i>P.-A. Jansson, J. Fowelin, U. Smith, and P. Lönnroth</i>	E218
--	------

LETTERS TO THE EDITOR

On plasma protein-mediated transport of steroid and thyroid hormones <i>C. M. Mendel, R. R. Cavalieri, and R. A. Weisiger; W. M. Pardridge</i>	E221
---	------

No. 3. SEPTEMBER 1988

Responsiveness of isolated adrenocortical cells from lean and obese Zucker rats to ACTH <i>B. D. White, W. D. Davenport, and J. R. Porter</i>	E229
Very-low-density lipoprotein triglyceride kinetics in acute and chronic carbohydrate-fed rats <i>T. Hirano, J. Mamo, M. Poapst, and G. Steiner</i>	E236
Steroid inhibition of canine ACTH: in vivo evidence for feedback at the corticotrope <i>M. Keller-Wood, E. Leeman, J. Shinsako, and M. F. Dallman</i>	E241
Metabolic fate of rat heart endothelial lipoprotein lipase <i>T. Chajek-Shaul, G. Bengtsson-Olivecrona, J. Peterson, and T. Olivecrona</i>	E247
Effects of corticotropin-releasing factor on food intake and brown adipose tissue thermogenesis in rats <i>K. Arase, D. A. York, H. Shimizu, N. Shargill, and G. A. Bray</i>	E255
Effect of α - and β -adrenergic stimulation on atrial natriuretic peptide release in vitro <i>N. L. M. Wong, E. F. C. Wong, G. H. Au, and D. C. K. Hu</i>	E260

Circadian variation in response to CRF-41 and AVP <i>M. Graf, A. J. Fischman, A. J. Kastin, and R. L. Moldow</i>	E265
[³ H]rauwolscine binding to myometrial α_2 -adrenoceptors in pregnant guinea pig <i>S. J. Arkinstall and C. T. Jones</i>	E272
Effect of postweaning thyroid status on edocrine and adipose development in rats <i>M. Q. Robert and E. Herrera</i>	E280
Regulation of corticotropin-releasing factor secretion in vitro by glucose <i>E. P. Widmaier, P. M. Plotsky, S. W. Sutton, and W. W. Vale</i>	E287
Binding proteins for growth hormone and prolactin in rabbit kidney cytosol <i>A. C. Herington, J. L. Stevenson, and S. I. Ymer</i>	E293
Effects of calcium on synthesis and secretion of parathyroid hormone and secretory protein I <i>R. R. MacGregor, D. A. Hinton, and R. D. Ridgeway</i>	E299
Effects of flow rate and insulin on triacylglycerol secretion by perfused rat liver <i>D. L. Topping, G. B. Storer, and R. P. Trimble</i>	E306
Gonadal steroid effects on LH response to arachidonic acid and protein kinase C <i>F. Kamel and C. L. Kubajak</i>	E314
Quantitative study in vivo of methionine cycle in humans using [methyl- ² H ₃]- and [1- ¹³ C]methionine <i>K. J. Storch, D. A. Wagner, J. F. Burke, and V. R. Young</i>	E322
Short-term energy balance: relationship with protein, carbohydrate, and fat balances <i>W. G. H. Abbott, B. V. Howard, L. Christin, D. Freymond, S. Lillioja, V. L. Boyce, T. E. Anderson, C. Bogardus, and E. Ravussin</i>	E332
Angiotensin II causes sustained elevations in cytosolic calcium in glomerulosa cells <i>R. E. Kramer</i>	E338
Increased SR phospholipid N-methylation in skeletal muscle of diabetic rats <i>Y. Taira, P. K. Ganguly, V. Panagia, and N. S. Dhalla</i>	E347
Triton WR-1339 injected into rats enters renal renin granules <i>B. J. Morris</i>	E353
In vivo characterization of insulin uptake by dog renal cortical epithelium <i>C. I. Whiteside, C. J. Lumsden, and M. Silverman</i>	E357
Physiological hypercortisolemia increases proteolysis, glutamine, and alanine production <i>D. Darmaun, D. E. Matthews, and D. M. Bier</i>	E366
Glucose transport: locus of muscle insulin resistance in obese Zucker rats <i>W. M. Sherman, A. L. Katz, C. L. Cutler, R. T. Withers, and J. L. Ivy</i>	E374
Ouabain induces secretion of proatrial natriuretic factor by rat atrial cardiocytes <i>K. D. Bloch, N. Zamir, D. Lichtstein, C. E. Seidman, and J. G. Seidman</i>	E383
Perinatal expression of the atrial natriuretic factor gene in rat cardiac tissue <i>J. Wu, C. F. Deschepper, and D. G. Gardner</i>	E388
Dexamethasone regulates glutamine synthetase expression in rat skeletal muscles <i>S. R. Max, J. Mill, K. Mearow, M. Konagaya, Y. Konagaya, J. W. Thomas, C. Banner, and L. Vitkovic</i>	E397

LETTERS TO THE EDITOR

Plasma protein-mediated transport of steroid and thyroid hormones: a critique <i>R. P. Ekins and P. R. Edwards; W. M. Pardridge and E. M. Landaw</i>	E403
---	------

No. 4. OCTOBER 1988

Effect of thyroidectomy on rat T-kininogen <i>J. Bouhnik, F. Savoie, T. Baussant, A. Michaud, F. Alhenc-Gelas, and P. Corvol</i>	E411
Effect of sex steroids on peak bone density of growing rabbits <i>V. Gilsanz, T. F. Roe, D. T. Gibbens, E. E. Schulz, M. E. Carlson, O. Gonzalez, and M. I. Boechat</i>	E416

Diazoxide unmasks glucose inhibition of insulin release by counteracting entry of Ca^{2+} <i>P. Bergsten, E. Gylfe, N. Wesslén, and B. Hellman</i>	E422
Metabolic role of the exercise-induced increment in epinephrine in the dog <i>J. M. Moates, D. B. Lacy, R. E. Goldstein, A. D. Cherrington, and D. H. Wasserman</i>	E428
Effects of hypercalcemia and ouabain on plasma atrial natriuretic polypeptide in anesthetized dogs <i>A. Yamamoto, T. Shouji, S. Kimura, Y. Aki, A. Nakamura, K. Fukui, H. Iwao, and Y. Abe</i>	E437
Modulation of rat testes lipid composition by hormones: effect of PRL and hCG <i>E. Sebokova, A. Wierzbicki, and M. T. Clandinin</i>	E442
Effect of vasopressin on atrial natriuretic peptide release and renal function in dogs <i>M. Inoue, T. Kimura, K. Ota, K. Iitake, M. Shoji, K. Sato, M. Ota, and K. Yoshinaga</i>	E449
Effect of prior immobilization on muscular glucose clearance in resting and running rats <i>J. Vissing, T. Ohkuwa, T. Ploug, and H. Galbo</i>	E456
Central catecholaminergic system stimulates secretion of CRH at different sites <i>A. Szafarczyk, V. Guillaume, B. Conte-Devolx, G. Alonso, F. Malaval, N. Pares-Herbuté, C. Oliver, and I. Assenmacher</i>	E463
Role of Ca^{2+} and Na^{+} on luteinizing hormone release from the calf pituitary <i>J. P. Kile and M. S. Amoss, Jr.</i>	E469
Regulation of valine and α -ketoisocaproate metabolism in rat kidney mitochondria <i>R. H. Miller and A. E. Harper</i>	E475
Gonadotropin-releasing hormone sensitivity in underfed prepubertal female rats <i>K. M. Lively and B. E. Piacsek</i>	E482
Calcium response of single adrenal glomerulosa cells to external potassium <i>S. J. Quinn, G. H. Williams, and D. L. Tillotson</i>	E488
Cold exposure rapidly induces virtual saturation of brown adipose tissue nuclear T_3 receptors <i>A. C. Bianco and J. E. Silva</i>	E496
Distinct receptors for insulin-like growth factor I in rat renal glomeruli and tubules <i>D. J. Pillion, J. F. Haskell, and E. Meezan</i>	E504
Induction of mRNA for IGF-I and -II during growth hormone-stimulated muscle hypertrophy <i>J. D. Turner, P. Rotwein, J. Novakofski, and P. J. Bechtel</i>	E513
Metallothionein response to stress in rats: role in free radical scavenging <i>J. Hidalgo, L. Campmany, M. Borrás, J. S. Garvey, and A. Armario</i>	E518
Pituitary-adrenal response to bacterial endotoxin in developing rats <i>L. Witek-Janusek</i>	E525
Multiple renin forms in the adrenal gland <i>S. H. Kim, F. M. Sessler, and R. L. Malvin</i>	E531
Acute inhibition of rat heart protein synthesis in vitro during β -adrenergic stimulation or hypoxia <i>S. J. Fuller and P. H. Sugden</i>	E537
Insulin responsiveness of protein metabolism in vivo following bedrest in humans <i>R. E. Shangraw, C. A. Stuart, M. J. Prince, E. J. Peters, and R. R. Wolfe</i>	E548
Impact of sex steroids and their suppression on skeletal growth and maturation <i>P. A. Boepple, M. J. Mansfield, K. Link, J. D. Crawford, J. F. Crigler, Jr., D. C. Kushner, R. M. Blizzard, and W. F. Crowley, Jr.</i>	E559
Effect of prolactin on enzymes of lipid biosynthesis in mammary gland explants <i>S. B. Waters and J. A. Rillema</i>	E567

Microdialysis of adipose tissue and blood for in vivo lipolysis studies <i>P. Arner, J. Bolinder, A. Eliasson, A. Lundin, and U. Ungerstedt</i>	E737
Precursors to glycogen in ovine fetuses <i>L. L. Levitsky, J. B. Paton, and D. E. Fisher</i>	E743

ANNOUNCEMENTS	E748
----------------------	------

No. 6. DECEMBER 1988

A novel general biophysical model for simulating episodic endocrine gland signaling <i>J. D. Veldhuis and M. L. Johnson</i>	E749
Role of interleukin 1 and tumor necrosis factor on energy metabolism in rabbits <i>E. E. Tredget, Y. M. Yu, S. Zhong, R. Burini, S. Okusawa, J. A. Gelfand, C. A. Dinarello, V. R. Young, and J. F. Burke</i>	E760
Rates and tissue sites of non-insulin- and insulin-mediated glucose uptake in humans <i>A. D. Baron, G. Brechtel, P. Wallace, and S. V. Edelman</i>	E769
Evaluation of pulse-detection algorithms by computer simulation of hormone secretion <i>V. Guardabasso, G. De Nicolao, M. Rocchetti, and D. Rodbard</i>	E775
Nonadrenergic sympathetic neural influences on basal pancreatic hormone secretion <i>B. E. Dunning, B. Ahrén, R. C. Veith, and G. J. Taborsky, Jr.</i>	E785
Adrenergic control of renin in euhydrated and water-deprived conscious dogs <i>Y.-H. Chen, H. Hisa, K. J. Radke, J. L. Izzo, Jr., C. D. Sladek, and M. L. Blair</i>	E793
α -Adrenergic modulation of glutathione metabolism in isolated rat hepatocytes <i>J. M. Estrela, F. Gil, J. M. Vila, and J. Viña</i>	E801
Effect of insulin on [3 H]deoxy-D-glucose pharmacokinetics in the rat <i>S. M. Furler, A. B. Jenkins, and E. W. Kraegen</i>	E806
Acidosis-induced glucose intolerance is not prevented by adrenergic blockade <i>H. J. Adrogué, Z. Chap, Y. Okuda, L. Michael, C. Hartley, M. Entman, and J. B. Field</i>	E812
Exercise regulation of triiodothyronine metabolism <i>H. L. Katzeff, D. Bovbjerg, and D. A. Mark</i>	E824
GHRF causes biphasic stimulation of SRIF secretion from rat hypothalamic cells <i>S. Richardson, S. Twente, and T. Audhya</i>	E829
Abnormal regulation of cAMP accumulation in pancreatic islets of obese mice <i>M. A. Black, H. M. C. Heick, and N. Bégin-Heick</i>	E833
Naloxone attenuates development of hypertension in two-kidney one-clip Goldblatt rats <i>M. Chen, J. Lee, R. L. Malvin, and B. S. Huang</i>	E839
Glucose intolerance in thyrotoxic rats: role of insulin, glucagon, and epinephrine <i>T. Ikeda, O. Mokuda, M. Tominaga, and H. Mashiba</i>	E843
Adrenalectomy eliminates both fiber-type differences and starvation effects on denervated muscle <i>R. R. Almon and D. C. Dubois</i>	E850
Androgenic influences on body size and composition of adult rhesus monkeys <i>J. W. Kemnitz, K. K. Sladky, T. J. Flitsch, S. M. Pomerantz, and R. W. Goy</i>	E857
Changes in GDP binding to brown adipose tissue mitochondria and the uncoupling protein <i>A. G. Swick and R. W. Swick</i>	E865
Effect of isotope infusion and sampling sites on glucose kinetics during a euglycemic clamp <i>F. Jahoor, S. Klein, H. Miyoshi, and R. R. Wolfe</i>	E871
Glucocorticoids and inhibition of bone formation induced by skeletal unloading <i>B. P. Halloran, D. D. Bikle, C. M. Cone, and E. Morey-Holton</i>	E875
Neuropeptide Y mobilizes Ca^{2+} and inhibits adenylate cyclase in human erythroleukemia cells <i>H. J. Motulsky and M. C. Michel</i>	E880
Peripheral metabolism of PTH: fate of biologically active amino terminus in vivo <i>F. R. Bringhurst, A. M. Stern, M. Yotts, N. Mizrahi, G. V. Segre and J. T. Potts, Jr.</i>	E886

Regulation of plasma lipid transfer by the high-density lipoproteins <i>J. H. Tollefson, A. Liu, and J. J. Albers</i>	E894
Structure and function changes in rat adrenal glands during aging <i>E. Reaven, M. Kostina, J. Ramachandran, and S. Azhar</i>	E903
Selective induction of high-ouabain-affinity isoform of Na ⁺ -K ⁺ -ATPase by thyroid hormone <i>R. S. Haber and J. N. Loeb</i>	E912
Relative contributions of the nervous system and hormones to CNS-mediated hyperglycemia <i>A. Iguchi, M. Gotoh, H. Matsunaga, A. Yatomi, A. Honmura, M. Yanase, and N. Sakamoto</i>	E920
Time-dependent involvement of autonomic nervous system in hyperglycemia due to 2-deoxy-D-glucose <i>H. Yamamoto, K. Nagai, and H. Nakagawa</i>	E928
Contribution of the kidney to metabolic clearance of atrial natriuretic peptide <i>R. L. Woods</i>	E934
No accumulation of glucose in human skeletal muscle during euglycemic hyperinsulinemia <i>A. Katz, B. L. Nyomba, and C. Bogardus</i>	E942
Interaction of carnitine with insulin-stimulated glucose metabolism in humans <i>E. Ferrannini, G. Buzzigoli, S. Bevilacqua, C. Boni, D. Del Chiaro, M. Oleggini, L. Brandi, and F. Maccari</i>	E946

RAPID COMMUNICATIONS

Independent stimulation of glucose metabolism and Na ⁺ -K ⁺ exchange by insulin in the human forearm <i>E. Ferrannini, S. Taddei, D. Santoro, A. Natali, C. Boni, D. Del Chiaro, and G. Buzzigoli</i>	E953
